Weekly **MORBIDITY REPORT**

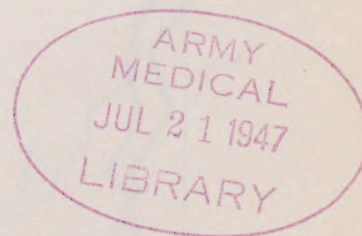

SHORE STATIONS IN CONTINENTAL UNITED STATES

NAVMED 104

WEEK ENDING 26 October 1946

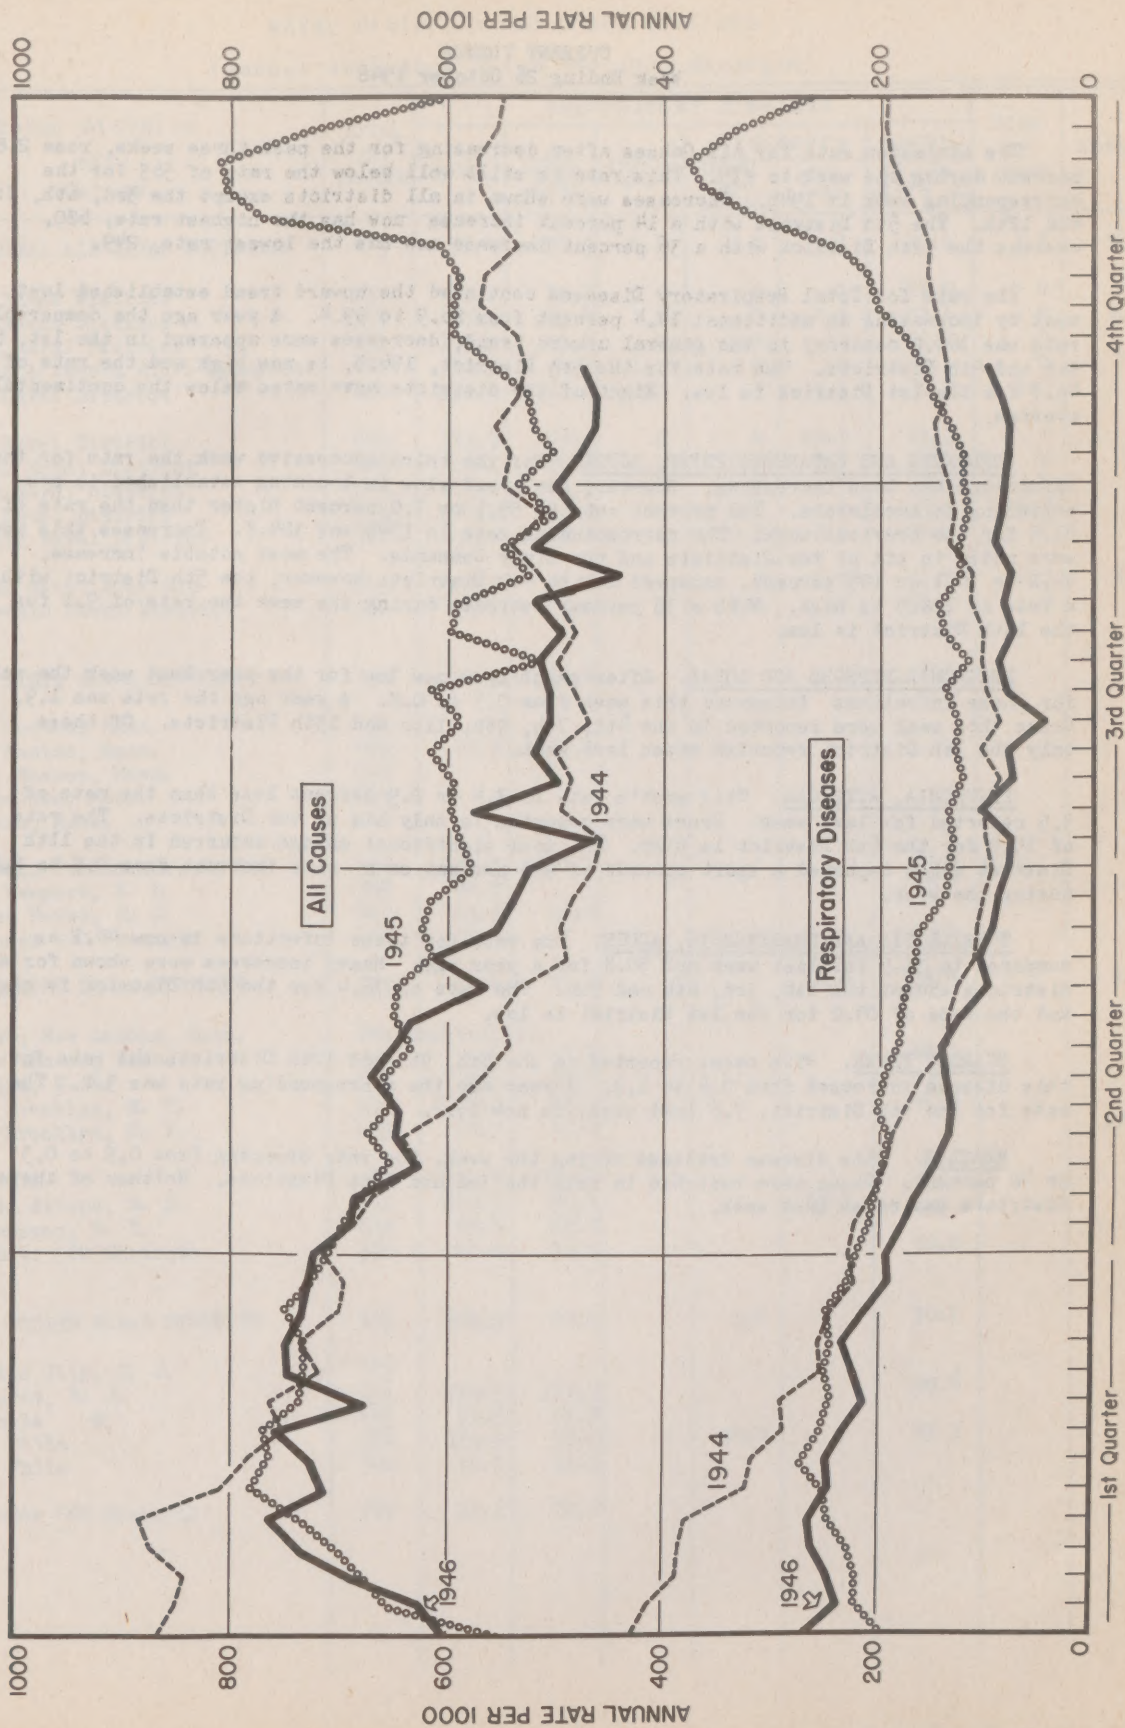

REPORT NO. 252

RESTRICTED——THE INFORMATION IN THIS REPORT IS NOT TO BE COMMUNICATE
DIRECTLY OR INDIRECTLY TO THE PRESS OR TO ANYONE NOT IN THE ARMED FORCE

ADMISSION RATES—ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES—1944, 1945, 1946

WEEKLY MORBIDITY REPORT

RESTRICTED

CURRENT TRENDS
Week Ending 26 October 1946

The admission rate for All Causes after decreasing for the past three weeks, rose 2.8 percent during the week to 475. This rate is still well below the rate of 563 for the corresponding week in 1945. Increases were shown in all districts except the 3rd, 6th, 7th and 12th. The 5th District with a 14 percent increase now has the highest rate, 680, whereas the 12th District with a 36 percent decrease now has the lowest rate, 249.

The rate for Total Respiratory Diseases continued the upward trend established last week by increasing an additional 14.4 percent from 86.9 to 99.4. A year ago the comparable rate was 160.2 contrary to the general upward trend, decreases were apparent in the 1st, 6th, 8th and 9th Districts. The rate for the 5th District, 196.5, is now high and the rate of 48.7 for the 1st District is low. Eight of the districts have rates below the continental average.

INFLUENZA AND CATARRHAL FEVER, ACUTE. For the third successive week the rate for these infections has been increasing. However, the trend slow in becoming established is now beginning to accelerate. The present rate is 55.1 or 7.0 percent higher than the rate of 51.5 for the previous week. The corresponding rate in 1945 was 104.8. Increases this week were noted in six of the Districts and the River Commands. The most notable increase, 34.2 to 70.1 or 105 percent, occurred in the 4th District; however, the 5th District with a rate of 118.9 is high. With a 35 percent decrease during the week the rate of 9.1 for the 13th District is low.

PNEUMONIA-BRONCHO AND LOBAR. After reaching a new low for the year last week the rate for these infections increased this week from 0.3 to 0.8. A year ago the rate was 1.9. Cases this week were reported in the 4th, 7th, 9th, 11th and 13th Districts. Of these only the 7th District reported cases last week.

PNEUMONIA, ATYPICAL. This week's rate is 3.4 or 2.9 percent less than the rate of 3.5 reported for last week. Cases were reported in only six of the Districts. The rate of 15.9 for the 6th District is high. The most significant change occurred in the 11th District which reported a spurt upwards of 975 percent or a rate increase from 0.8 to 8.6 during the week.

TONSILLITIS AND PHARYNGITIS, ACUTE. The rate for these infections is now 40.1 as compared to 31.5 for last week and 50.8 for a year ago. Heavy increases were shown for all districts except the 1st, 3rd, 6th and 9th. The rate of 76.4 for the 5th District is high and the rate of 20.0 for the 1st District is low.

SCARLET FEVER. With cases reported in the 5th, 9th and 12th Districts the rate for this disease increased from 0.6 to 1.3. A year ago the corresponding rate was 3.2. The rate for the 9th District, 7.6 last week, is now 15.2.

MEASLES. This disease declined during the week, the rate dropping from 0.5 to 0.3 or 40 percent. Cases were reported in only the 3rd and 12th Districts. Neither of these Districts had cases last week.
